Summary

I have been coding since I was in elementary school, but all of my work experience so far has been in retail and logistics. I have recently completed several professional certifications in IT and web development, and I am looking to pivot into a role as a full-stack web developer. A selection of my web work can be found at ekstedt.dev. My passion for coding and my hunger to learn more frameworks and technologies make me the perfect addition to any growing software team.

Skills

- Web Development: HTML, CSS, JS, React, Vue, MongoDB, NodeJS.
- Additional Programming Languages: Python, VBA, Java, Haskell.
- Office and Professional Software: Microsoft, Libre, SAP, Git, Figma.

Certificates

- The Complete 2022 Web Development Bootcamp
- Google IT Support Professional Certificate
- Google IT Automation with Python
